

Simple Storage Network

Storage for the Disorganised Idiot

Simple Storage Network is used to create a network connecting several inventories to network allowing access through all of them either through direct or remote access.

Setup:

For the simplest setup of a storage network you need a chest, an Inventory(Chest), [Cable](#), a Storage Network Master, and a [Storage Inventory](#). The Inventory Cable must be directly connected to the Inventory, and can be directly connected to the Storage Network Master or indirectly through the use of [Storage Cables](#). The Storage Inventory can be connected to the Storage Network Master by being placed adjacent to it, or connected through Storage Cables. The items in the Inventory can now be accessed by right clicking the Storage Inventory.

Automation:

For Automation three things are required a Crafting Block(Furnace), Processing Cable Controller
